

Touchless Solutions

No touch. No compromise.

Roca

The EM1 Touchless dual flush valve

Zero contact Maximum hygiene

Wave goodbye to germ-ridden flush buttons

A touchless transformation

The EM1 valve can be simply retrofitted to upgrade an existing push button to an automatic toilet flush button.

Ease of installation

Quick and easy to install with minimal effort.

No electric connection needed

Powered by 4 AA batteries (not included) that guarantee more than 40,000 flushes.

Easy to use

With just a simple wave of the hand. The EM1 recognises the required flush (full or half flush volumes).

Water saving

Full and half flushes can be adjusted easily to 6/4, 4.5/3 or 4/2 litre dual flush settings.

Touchless hygienic flushing

With a sleek designed sensor push button, you can flush your WC in a hygienic way.

Full or half flush

Quick install

Allows the transformation of conventional push button cisterns into touchless ones with minimal effort.

Nothing touches the EM1 for features

EM1

Touchless dual flush universal mechanism

Ref. 822599900 - £106.80

TOUCHLESS

Touchless - Hygiene

The flush activates without contact thanks to an integrated infrared sensor, avoiding the spreading of viruses and the growth of bacteria.

No electrical installation

It works on 4 AA batteries (not included) that guarantee more than 40,000 flushes.

Manual battery back-up

It also works manually if the batteries run out.

Adjustable dual flush

Full and half flush volumes to be adjusted between 2 and 6 litres.

The dual flush valve body has WRAS approval.

Universal

Compatible with most cisterns with a ø40mm cistern hole and an external cistern height (with cistern lid) of 360-390mm.

Touchless innovation from Roca

Roca's Touchless solutions are suitable for both domestic and commercial use, providing an extra layer of safety within the bathroom. Featuring infrared sensors, touchless products allow users to activate the water flow in taps, the flush of the WC or the mirror light using a simple movement without the need for contact, avoiding the spreading of viruses and the growth of bacteria.

More hygiene

Its infrared sensor activates the water flow when presence is detected, avoiding direct hand contact.

More savings

The water flow is automatically shut off when the infrared sensor stops detecting presence, preventing the unnecessary waste of water.

Durability

The power supply by four 1.5 V LR6 (AA) alkaline batteries guarantees over 250,000 uses.

Easy cleaning

The lack of contact with the tap improves hygiene and prevents the build up of droplets and fingerprints on its surface, resulting in a cleaner product for much longer.

Easy installation

Its battery or mains operated system allows its installation in any bathroom, regardless of the availability of a power outlet in the area of usage.

Anti-vandal

Its one-piece design, without a lever, ensures the integrity of the product and prevents its theft in public spaces.

Greater safety

Its electronic device stops the water flow after a preset usage time to promote a moderate use and prevent the uninterrupted flow of water.
